

# Corona Protection Point

## Enable Safer Work!

Interactive and contactless: Protect your employees and visitors and provide interactive information on the virus and the latest developments - with no risk of infection. Perfect for any entrance area.

VISIT US

### Short Description Product

Contactless sanitizing

Interactive content on brilliant screen

Information according to Robert Koch Institute. Medical scientific advisor: Prof. Dr. med. Zenner, Universität Tübingen

Touchless Interaction

### Features

**Contactless Control**

The operation of the screen through simple hand gestures in the air allow interaction without risk of infection.

**Interactive Hand Sanitizing**

The virtual doctor not only explains how to sanitize your hands correctly - she also shows how it works and invites you to join her.

**Individual User Statistics**

Protect and inform your employees and use your Smart Data to prove that you comply with employer's obligation to inform employees.

### Content

**Measures for Everyone**

Short description videos show everyone that stops by which preventative measures can be taken. This will stick in your memory.

**Company-specific Content**

What is particularly important in your company? Inform your visitors and employees about the most important news and guidelines.

**Daily Developments**

Stay up-to-date and inform your employees and visitors about the latest developments.
